

STI UNIVERSITY 2010

FLEX WALKMOWERS (STIU 2010) (FL-2010)

Complete teardown & evaluation of the Flex Greensmower Gearbox will be the focus of this presentation. Students will get hands on experience concerning all aspects of the Flex Walkmowers to include reel set-up, engine performance, maintenance and repair of the gearbox and drum drive system.

REEL TECHNOLOGY (STIU 2010) (RT-2010)

Formerly our New Technician's Seminar, this seminar concentrates on the science of reel cutting units, as well as evaluating aftercut appearance, reconditioning, setup and repair. Professionalism, Basic Hydraulics and Equipment Electrical Systems are covered along with all things unique to our industry. By far our most popular seminar, students of all backgrounds and levels of experience will advance their understanding and practical knowledge of modern reel cutting units.

REELMASTER 5010 SERIES (STIU 2010) (RM-2010)

The Reelmaster 5010 Series is an entirely new traction unit utilizing the famed DPA Cutting units in both 5" and 7" configurations. Product developments and performance enhancements, combined with new technology make this seminar a necessity for any technician charged with the maintenance and care of 5210, 5410, 5510 and 5610 Fairway Units.

GROUNDMASTER 4500D/4700D (STIU 2010) (GR-2010)

A popular Product Specific Seminar last year, the 4500/4700D returns for a comprehensive look into all aspects of the traction unit; engine, driveline and controls as well as maintenance, repair and adjustment of the cutting units. Our newest production model incorporates many new features and design changes. A great class!

ELECTRICAL SEMINAR (STIU-2010) (EL-2010)

This coursework takes you from electron theory and basic circuits all the way to complex electrical diagrams, troubleshooting, component testing and secondary ignition systems. Always in demand, a great deal of information and valuable instruction is provided for beginners and professionals alike. Experiments and demonstrations reinforce the curriculum throughout the day!

SPRAY SYSTEMS AND CONTROLS (STIU-2010) (SS-2010)

A large portion of technical calls received are related to Spray Systems and their controls. This coursework is designed to take the mystery out of control systems used on all Toro Multipro Sprayers. Flow management, adjustment, troubleshooting and calibration are often the tasks handed to technicians via confusing terms and vague descriptions of the problem. We'll take down the language barrier and put you in control with a comprehensive understanding of the system and its abilities. Applicators welcome!
