

2017 NC CEU Events

Get all of your NC CEUs in one fun and informative event!

Key topics to be covered...

Sponsored in cooperation with:

7 am [1 hour]

Managing Large Irrigation Systems

This class will cover the most cost effective ways to manage large systems via centralized control systems with onsite and offsite capabilities for monitoring control.

8 am [2 hours]

Master Planning Irrigation Systems

Planning for the future expansion and total water needs is crucial in order to ensure a working and efficient irrigation system at completion. We will discuss how to calculate total water needs and to convert that into an effective water source for the sites needs.

10 am [2 hours]

Bidding & Estimating 2

We will dig a little deeper into the techniques needed to properly calculate overhead, material costs, labor, and miscellaneous job costs.

12 pm [2 hours]

Running a Successful Service Business

You will learn how to properly run, price, and maintain a successful service business in the irrigation industry. We will teach you how to capitalize on the need and be successful while doing it!

2 pm [2 hours]

Drip Irrigation Design

How long can I run that drip line and how do I know I will have enough water and pressure at the end? Just like spray irrigation, these are all factors that need to be considered when designing the smallest to the largest drip systems.

4 pm [1 hour]

Filtration in the Irrigation System

As different water sources are explored the need for proper filtration to ensure the system operates properly is crucial. Learn all the different options for filtration and the proper way to size and select the filter for each situation.

Classes offered in both Charlotte and Raleigh
